INTRODUCTION

The National Park Service Statistical Office acknowledges the conscientious efforts of the field staff of the many areas of the National Park System. Without the effort of the park staff to count, record, and report the data summarized here, a statistical report of this quality would not be possible. These public use data are collected and analyzed monthly. A program of park counting procedure audits is conducted to ensure consistency and accuracy of data.

The gathering and publication of these statistics is in accordance with Public Law 88-29, "An Act to promote the coordination and development of effective programs relating to outdoor recreation" and related legislation. Definitions of terms in use here are given at the end of this report. The definitions are those initially outlined by "A Uniform Method for Measuring and Reporting Recreation Use on the Public Lands and Waters of the United States," unpublished guideline of the Recreation Advisory Council Study Committee Number Two, April, 1965.

In 1985 the following changes occurred:

Congaree Swamp National Monument began reporting;

Constitution Gardens was added to the system but is not reporting;

Eleanor Roosevelt National Historic Site began reporting;

Eugene O'Neill National Historic Site began reporting;

Fort Benton is no longer administrated by the NPS and is not listed;

Fort Donelson National Military Park renamed to National Battlefield;

Maggie L. Walker National Historic Site began reporting;

Missouri National Recreational River was added to the system but is not reporting;

Natchez Trace National Scenic Trail was added to the system but is not reporting;

Ninty Six National Historic Site began reporting;

Old Post Office Tower is reporting with National Capitol Parks as an affiliated area in 1985, the only affiliated area to report because of NPS staffing of the facility;

Potomac Heritage National Scenic Trail was added but is not reporting;

Rio Grande National River began reporting separately;

War in the Pacific National Historic Park began reporting.

Additional footnotes are provided at the end of this report. The footnotes describe conditions at parks which may require important adjustments for certain applications of these data.

Timely, reliable, and useful information is fundamental to effective management and planning of the National Park System. This annual report is a general summary of visitation records for the year.
